- Design Development
- Preparation of Contract Documentation
- Tendering & Tender evaluation of projects
- Construction administration
- Post contract project reviews
- Occupancy evaluation services
- Project management

KEY SERVICES

Thinking outside the square is more than a motto for Keith Savage.

Creative, cost-effective solutions for clients is part of his career DNA. It's embedded in every step of every project he undertakes from initial concept to design to documentation and delivery. Keith's problem-solving approach delivers unique outcomes for clients in all manner of contexts.

Beyond providing architectural design, drawings and advice, Keith delivers more than 25 years' experience to clients in all aspects of the development process. This is where outside the square thinking meets proactive project management and efficiencies on projects large and small.

After years of experience on major projects in Sydney and other capital cities, Keith turned his focus to delivering for clients in Northern Australia, adapting each project to suit its unique circumstances.
